

PADMA SRI SWASTHIK

Hyderabad, India | +91 9030172558 | padmasriswasthik@gmail.com

Portfolio | LinkedIn | Github

PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering student (lateral entry after a Diploma in Mechanical Engineering). Builds web applications with React, Node.js, and MongoDB, and designs user interfaces in Figma. Developed FinTrack, a full-stack personal finance application with 1,700+ automated tests. Seeking a Frontend Developer or Full-Stack Developer role.

EDUCATION

B. Tech — Computer Science & Engineering (Lateral Entry) | CGPA: 7.4/10.0

2025 – Present

Malla Reddy College of Engineering (MRCE)

Hyderabad, India

Diploma — Mechanical Engineering | CGPA: 7.3/10.0

2022 – 2025

Government Polytechnic Nizamabad

Nizamabad, India

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS

Frontend: React, Tailwind CSS, Vite

Backend & Databases: Node.js, MongoDB, MySQL, Prisma

Design: Figma, Canva, Miro, AutoCAD

Tools: Git, GitHub, VS Code, Postman, MongoDB Compass, Claude Code, Antigravity IDE, Notion

Deployment: Vercel, Netlify, Render

PROJECTS

FinTrack — Personal Finance Ledger

Github

React 19, TypeScript, Express 5, Prisma, PostgreSQL

- Built a full-stack web application that imports bank statements in CSV, Excel, and password-protected PDF formats, removes duplicate entries, and sorts transactions into categories automatically.
- Tested categorization on 704 transactions: 96.6% were categorized correctly and none were placed in a wrong category.
- Masked personal information (PII) before sending data to the AI model, sent only merchant names for classification, and added a setting to turn AI off; the app still works when no API key is set.
- Wrote statistical checks that detect price changes, subscriptions, unusual transactions, salary credits, EMIs, SIPs, and recurring bills; found 4 of 4 unusual transactions and 13 of 13 recurring bills in testing with no false positives.
- Implemented login with Google OAuth and rotating refresh tokens, along with ownership checks, rate limiting, a read-only demo account, and request-ID logging.
- Wrote 1,700+ automated tests (server tests on PostgreSQL and client tests) that run through continuous integration (CI) on every change.

EXPERIENCE

Co-Founder & Frontend Developer

2026 – Present

Vistaar — Web Design and Development Agency

- Co-founded Vistaar, an agency that designs and builds websites for businesses.
- Designed website layouts in Figma and developed them as responsive websites using React, Vite, and Tailwind CSS.
- Handled client projects from design and development through to deployment.
